إِقْرَأْ

Iqra Quran Reader

Most people who grew up reciting the Quran can read the Arabic without stumbling — and understand almost none of it. Iqra is built for that gap. Tap any word and its Urdu meaning appears. Mark it as known, and it turns green every time it shows up across the whole Quran — so by the time you've read Al-Faatiha a few times, you start recognising الرَّحْمَٰنِ everywhere.

It won't make you fluent in a week. But if you use it while reading the Quran anyway, the words start sticking.

01

Getting Started

Open the file in any browser. No sign-up, no subscription, nothing to configure. The first time it loads, everything downloads to your device — all 604 pages, every word's meaning, the grammar rules. After that, no internet needed.

📖

Full Quran

All 114 surahs, page by page, with Urdu translation.

👆

Tap any word

Works in the Mushaf, search results, duas, and grammar

✅

Known words

Mark a word as known — it turns green everywhere it appears.

examples.

🔍

Search

Arabic or Urdu, diacritics optional, across all 604 pages.

🤲

Duas

Quranic and masnoon collections, every word tappable.

📚

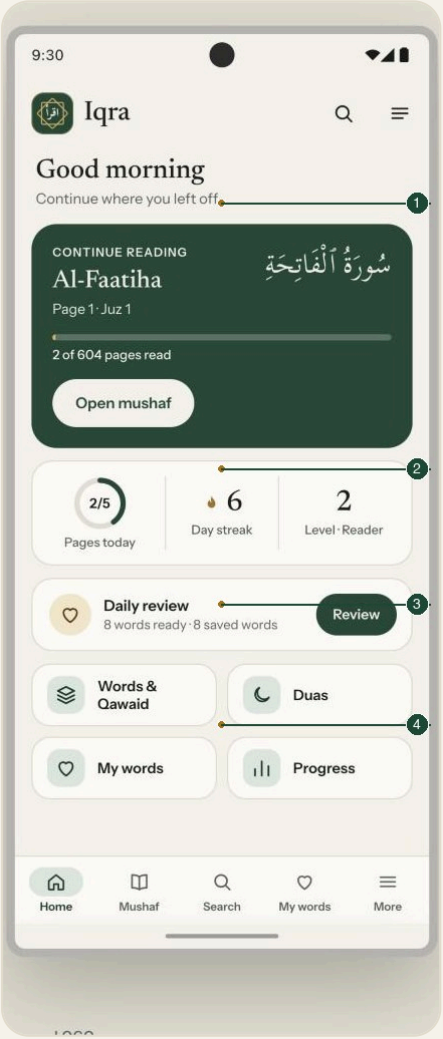

Qawaid

Grammar rules with live Quranic examples you can tap.

02

Home Screen

When you open the app, you see where you left off — which surah, which page — and a button to go straight back. The stats strip below shows today's pages against your goal, your streak, and your current level. If you've saved any words, there's a review card too.

HOME

1. Resume card — last surah and page. Tap *Open mushaf* to continue reading.
2. Daily stats — pages today, day streak, current level.
3. Daily review — words you've saved. Tap Review to run through them.
4. Quick links — Words & Qawaid, Duas, My words, Progress.

Mushaf

Reads like a physical mushaf — one page at a time, same right-to-left layout. The difference is that every Arabic word is a button. Swipe left or right to turn pages, or use the Prev / Next buttons at the bottom.

MUSHAF SCREEN

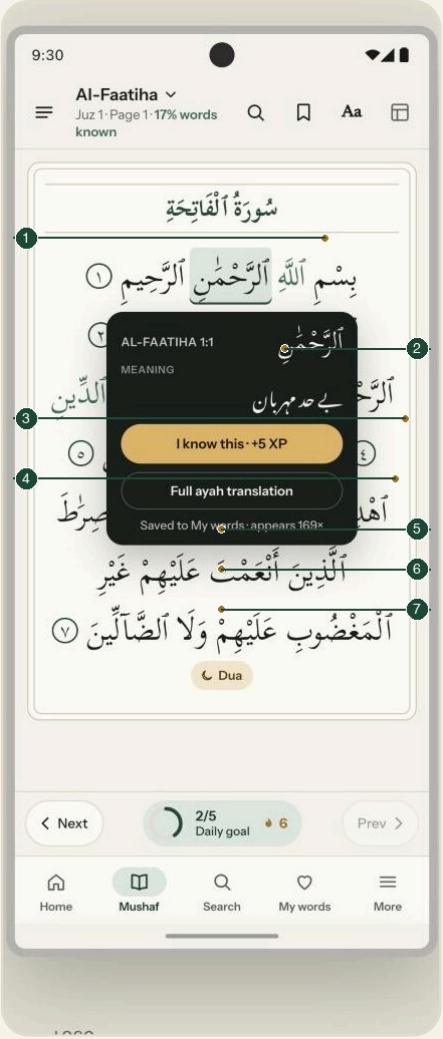

1. Surah name & chevron — tap to jump to a different Surah, Juz, or page number.
2. % of words on this page you've already marked as known.
3. Toolbar — Search · Bookmark · Font size (Aa) · Page view toggle.
4. Ayah number badge — tap it to show the full Urdu translation of that ayah.
5. Bottom bar — Prev / Next, daily goal ring, streak flame.

> All 604 pages are saved on your device after the first load. Airplane mode, no signal — doesn't matter.

04

Word Meanings

Tap any Arabic word — on a Mushaf page, inside a dua, in search results, anywhere — and a dark card slides up. It shows the word in large script, the Urdu meaning, and how many times that word appears across the whole Quran. That frequency number is worth paying attention to: once you know الرَّحْمَٰنِ, you've unlocked a word that shows up 169 times.

MEANING CARD

1. Tapped word is highlighted in the text above.
2. Reference — which surah and ayah this word is from.
3. Arabic word in large Scheherazade script.
4. Urdu meaning in Nastaliq.
5. **I know this · +5 XP** — marks the word known, turns it green globally.
6. Full ayah translation — expands the complete Urdu translation.
7. How many times this word appears in the Quran.

> Tapped a word by mistake and marked it known? Tap it again — the button will say "Known word ✓" and tapping removes the status.

05

Search

The search ignores diacritics, so you don't need to type رَبِّ exactly — just رب works. Switch between *Whole words* and *Any part* depending on how well you remember the phrase. Results show up as Mushaf-style ayahs with the match highlighted in yellow and any words you already know highlighted in green.

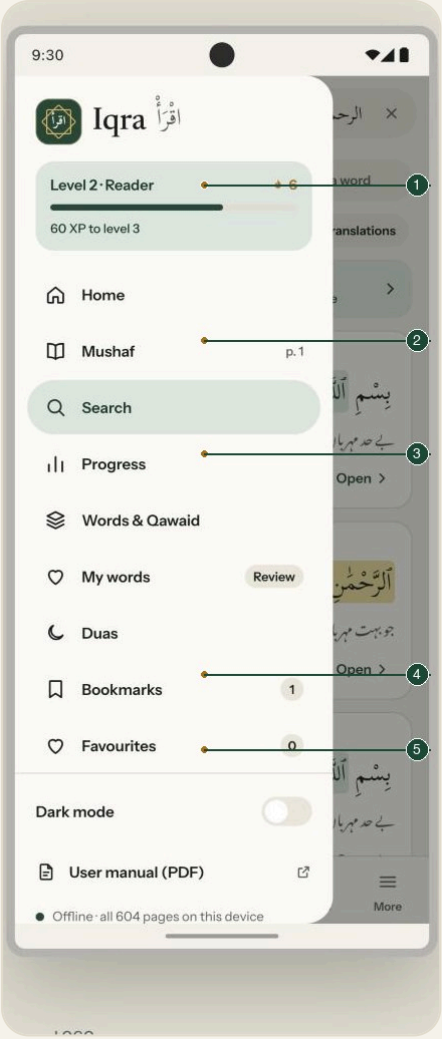

SEARCH RESULTS

1. Search bar — type Arabic or Urdu, diacritics optional.
2. Whole words / Any part — changes whether partial matches count.
3. Result count — shows the first 150 of however many were found.
4. View all on one page — opens every matching ayah together, mushaf-style.
5. Yellow = this word matched. Green = you've marked it known. Tap either for its meaning.
6. Open › — jumps to that ayah's page in the Mushaf.

06

Navigation Drawer

Tap **More** ≡ in the bottom nav to open the full menu. This is where dark mode lives, and where you can see the offline confirmation at the bottom — a green dot saying all 604 pages are already on your device.

MORE DRAWER

1. Your current level and how much XP to the next one.
2. Active screen — the Mushaf row shows which page you're on.
3. All sections — Progress, Words & Qawaid, My words, Duas, Bookmarks, Favourites.
4. Dark mode — toggle for night reading.
5. Offline — all 604 pages are stored on this device.

07

Duas

Two halves: **Qur'anic** duas drawn from specific ayahs (filtered by Juz), and **Daily masnoon** prophetic supplications. The word-tap works the same as in the Mushaf — so if you're memorising Ayat ul Kursi or the last three quls, you can tap each word while you learn it. Marking a dua as memorised earns 25 XP.

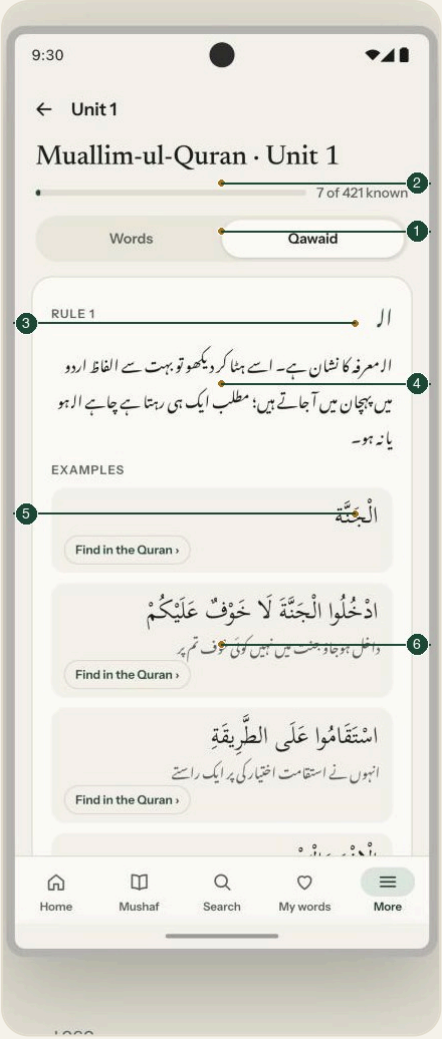

DUAS SCREEN

1. Qur'anic / Daily masnoon tabs.
2. Juz filter — narrow down to duas from a specific part of the Quran.
3. Dua title and Quran reference, e.g. Al-Faatiha 1:5–7 · Juz 1.
4. Tappable Arabic text — tap any word for its meaning. Known words tinted green.
5. Urdu translation in Nastaliq script.
6. Mark memorised · +25 XP.

08

Words & Qawaid

Seven units following the Muallim-ul-Quran curriculum. Each unit has two tabs. **Words** lists the vocabulary for that unit — tap a word to see its meaning, tap the check to mark it known. **Qawaid** shows the grammar rules with real Quranic phrases as examples. The rules won't replace a grammar class, but seeing ال explained and then immediately tapping through six Quranic examples that use it is a faster way to make it stick than reading a definition alone.

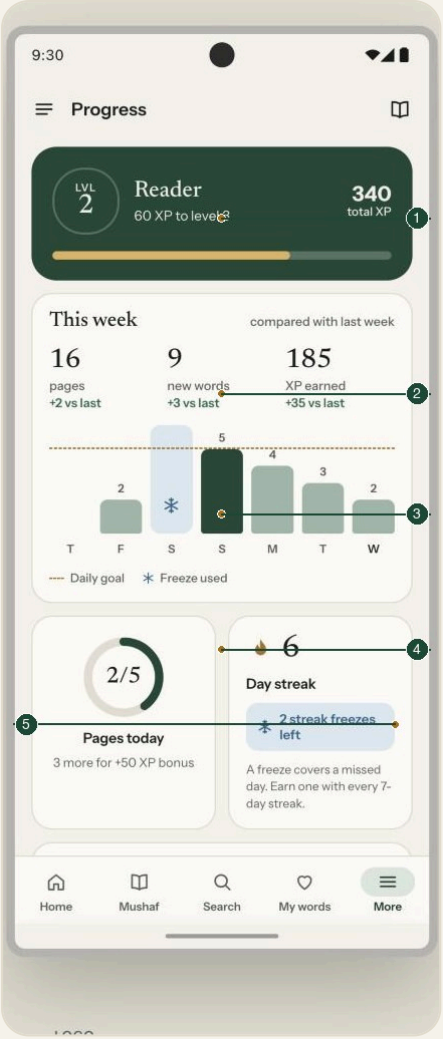

QAWAID · UNIT 1

1. Words / Qawaid tab toggle.
2. Progress bar — words known in this unit out of total.
3. Rule number and Arabic term — e.g. RULE 1 · ال (the definite article).
4. Urdu explanation of the rule.
5. Tappable Quranic examples showing the rule in actual use.
6. Find in Quran › — searches the whole Quran for that phrase.

09

Progress & XP

The Progress screen keeps score. Your level goes up as you earn XP — 5 per word you mark known, 25 per dua memorised. The bar chart shows pages read per day against your daily goal (the dashed line). The streak counter tracks consecutive days of reading; if you miss a day, a streak freeze covers it. You earn one freeze for every seven-day streak.

PROGRESS SCREEN

1. Level card — name (e.g. Reader), total XP, and how far to the next level.
2. Weekly stats — pages, new words, and XP earned, compared to last week.
3. Reading chart — each bar is one day; dashed line is your daily goal.
4. Pages today ring — how close you are to today's target.
5. Day streak and freeze count — freezes cover a missed day automatically.

ACTION	XP EARNED
Mark a word as known	+5
Mark a dua as memorised	+25

10

Settings & Install

A few things worth adjusting when you first open the app: bump the font size up if the Arabic is hard to read on your screen, and set a daily goal you'll actually hit — 2 pages a day is more sustainable than 10 for most people starting out.

Settings (tap Aa in the Mushaf toolbar)

SETTING	OPTIONS
Font size	Small / Medium / Large

SETTING	OPTIONS
Page view	Full page (like a mushaf) or continuous scroll
Word tinting	On = known words highlighted green while reading
Dark mode	Toggle in the More ≡ drawer
Daily goal	2, 5, or 10 pages

Install on iPhone or iPad

Must be Safari — Chrome and Firefox on iOS can't install PWAs.

1. Tap the **Share button** (the box with an arrow) in the Safari toolbar.
2. Tap **Add to Home Screen**, then Add. The app opens full-screen from now on, no browser bar.

Install on Android

1. Open in Chrome. Tap ⋮ → **Add to Home screen**, or tap the Install banner if one appears at the bottom.

Install on a computer

Look for the ⊕ **install icon** in the address bar of Chrome or Edge and click it.

> Once installed, the app is fully offline. Your vocabulary, streak, and XP are saved on your device — nothing is sent anywhere.

بِسْمِ اللَّهِ الرَّحْمَٰنِ الرَّحِيمِ
