Iqra — User Manual

Learn the Quran word by word

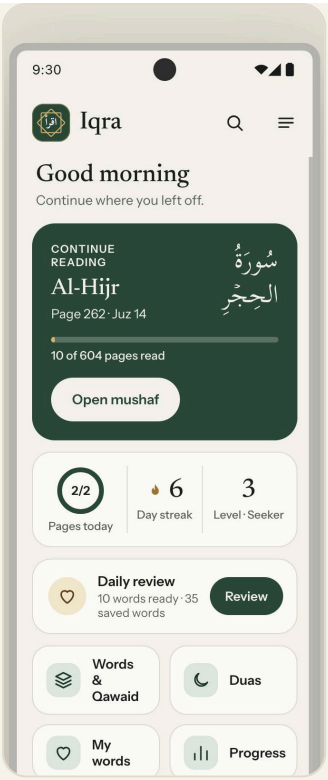

Most people who grew up reciting the Quran can read the Arabic without stumbling — and understand almost none of it. Iqra is built for that gap. Tap any word and its Urdu meaning appears right there in the text.

Who	What they get
People who recite daily but don't understand	Tap words during regular tilawat — no separate study session needed
Students learning Quranic Arabic	Word meanings + Qawaid rules together, anchored to real ayaat
Parents teaching children	No ads, no account, no setup — hand it over and it works
Anyone starting Quran from scratch	Daily goal + streak counter keeps the habit going
